In addition to the full version of SEB (installation via .msi file), a classic portable version can be built (copying of a zip file without installation), which has less functionality. Automatically disabling Chrome notifications using a Registry setting. Improved stability when setting and resetting Windows Registry settings to disable options like Task Manager, Switch User, Sign out and Shut down (accessible with the Ctrl+Alt+Del shortcut) during the exam and re-enabling them when quitting SEB. If you changed settings, the Config Tool will ask you to save unsaved changes before quitting or reverting to other settings. Now the user can during configuration define the values not only for inside but also for outside of SEB. SEB 3.x for Windows has been completely refactored and uses Chromium as integrated browser engine. Improved compatibility of .seb config file format with the upcoming SEB 2.0 RC/final release version for macOS. Now arguments for XULRunner can be specified containing Windows environment variables for paths (for example in Config Tool Applications -> Permitted Processes -> xulrunner.exe, new argument: -profile "%LOCALAPPDATA%\SafeExamBrowser\Profiles"). Another possible fix if this doesn't help is pressing Ctrl-Alt-Delete and then the cancel/back button. Added spell checking dictionaries in addition to US English for Danish, English UK/Canada/Australia, Spanish, French, Portuguese, Swedish, Swedish (Finnland) (da, en-AU, en-GB, en-US, es-ES, fr-classic, pt-PT, sv, sv\_FI). Fixed: Registry Resetter didn't complain and just did nothing when an nonexistent username has been typed in. For the same behavior as in previous versions, you can enable "Allow Reconfiguring" and set "Reconfiguring Config URL" to "\*" (wildcard symbol, meaning any seb(s) URL or download URL of a .seb config file is allowed to reconfigure SEB) in your SEB client settings. Allows you to define all options for Windows and MAC versions of SEB 2.0. You can save files .SEB for individual testing and exam client, which are protected by strong encryption against handling. We are already working at the next generation of SEB to Windows, which will be using a chrome-based browser engine (but this SEB 3.X branch will not replace Firefox-based seb before 2019). In some cases, to restore Windows Registration Settings for Windows Security Options (invoked by Ctrl-Alt-Del) fails, for example, when SEB crashes or the PC © Hard-Reset while seb is in execution. Use this feature to create a .SEB file to configure a customer and add the identity or identities you like to use to encrypt / decrypt files .SEB to start exams later. The SEB now deletes the browser profile folder by updating the SEB to avoid problems with navigator diversions are not updated and cache. Fixed the problem with the nonexistent temperature folder. Added "taskbar" added option for allowed processes. Removed "out of the seb" section on the registration tab in the SEB config tool, as SEB now remembers the configurations that were active on the customer's computer before running the Seb and redefines them to the original values when leaving regularly. When these options (or some of them) are not disposed of after the SEB's dropout (or if the seb crashed), usually the execution and leaving the SEB should restore them. New file locations for .ini and .Log files correspond to controversy for modern Windows applications. This should solve the problem that Xulrunner has not been closed correctly, especially in Windows 8.1 and failed to restart (profile in use). Reason: Windows does not accept executables, signed with a signature certificate since an update of safety of January 12, 2016 (if The execution was signed using the Sha-1 after this date). Fixed SEB does not finish starting properly when you can not add some allowed applications (which have been removed but are not properly uninstalled). Observation: You must activate the "ESC" key in the SEB configurations if the entire screen mode on your site is able to go out using the key (if you contain, it provides a botan Web Ginny!). The SEB is now signed with a new certificate of signature with a Sha-256 subscription. In touch mode, there is also an option for a sequence of agents of the iPad usual, as many optimized mobile sites recognize this agent of the user, but not the agent of the user from Windows Touch. Fixed two smaller problems with regard to door and path filtering in the URL filter. Added Varies Settlement Options to correspond to the end of the seb 2.0 for macos. When this happens, the SEB must be given up and the keyboard button on the Windows Explorer taskbar needs to be clicked (the keyboard is displayed). The -in flash plug is working again without alternative solutions. If the seb cannot hide this process (because it is being executed with the rights of another usual, for example, system), the seb ends it. Added a verification to detect additional files in the direction of the SEB program (which may have been left by updating from SEB's oldest versa) and display a warning in this case. Known Problems in SEB 2.0.1 for Windows: In some cases, you usually press the Alt-Ctrl twice, the keyboard seems to freeze (without possible text) in the SEB browser. Added added Options to switch between broadening the complete web pânia or just change text sizes. Fixed handling of prohibited application message in the configuration tool. Optional resources, which need to be configured individually and are deactivated by pattern: Added live procting support for zoom and has improved the integration of live procting with seb server. Added basic support for individual SEB proxy configurations in the .seb configuration files. Added basic support for secure questions with SEB Server and Moodle 3.9 (deeper integration). Liberation notes safe exam browser for Windows Version 3.3.1: Version 3.3.1 Improves the performance of optional seb-server integration, adds a manual raise functionality to the attorney Optional live remote with seb-server and corrects several lower problems. For the Moodle Learning Management System, a plug-in offering that this functionality has been launched, an Ilias plugin will follow soon (disposable beta). Configurations group added to the SEB taskbar for all new controls (see above). Zoom can also be optionally deactivated (not recommended in most examination scenes due to accessibility). In managed computers, this allows to implement the identity certificate in the "Local/People Trust" store when installing the SEB on an administrator account. Such files left also cause a wrong browser exam key. Safe exam browser notes for Windows versions 2.1.3: Current versions of Internet Explorer, Edge and Windows 10 complained of a seb installer in a power signature when downloading or starting it. Added support for the log the battery and WLAN with the SEB server. You can add a custom title and tooltip text, for example if the button/link does not restart the exam, but redirect to another specific page. The height of the taskbar in pixels can now be changed to high resolution(display DPI settings are now also taken into account, in the tactile optimized taskbar is scaled further). This is the latest version of Firefox compatible with the XUL browser engine application used in SEB. Safe Exam Browser for Windows version 2.1.1: Safe Exam Browser 2.1.1 is fully compatible with Windows 10, there is no delay starting on Windows 10 more and Windows updates are paused correctly while SEB is running. Best error message for display monitoring. This feature is still experimental. Release Notes Secure Exam Browser for Windows version 2.0RC2: Added dealing with a possible running condition when opening .seb files by double click. Release notes Safe Exam Browser for Windows version 3.3.0: Version 3.3.0 introduces optional live proctoring with Zoom, adds support for basic screen sharing in the integrated browser and fixes various problems reported by the community. In this case, SEB does not ask the user if the process can be terminated before continuing to start SEB. Fixed option to disable the shadow (snap) for the new VMware Horizon Client. Disable Windows Update while SEB is running doesn't work on Windows 10, it leads to a timeout (this is the reason for the delay when starting and reconfigure SEB). Fixed bug with reconfiguration mechanism and SEB service component. Use SEB Registry Resetter to fix this issue. Added Audio Control Component for SEB taskbar, which allows to increase/decrease and mute system audio volume. Fixed error where the file system dialog box failed to load network paths. paths.
