Introduce about City Racing 3D Referring to the racing genre, people often remember Asphalt 9: Legends of Gameloft or the Real Racing series released by Electronic Arts. However, these games are very heavy and require your device to have a strong enough configuration. You can't fulfil that, and you are looking for a lighter graphic game, but equally enjoyable experience? City Racing 3D is a perfect replacement. It also comes packed with a number of features to look forward to. Let learn about this game before you start the download and installation process! Take part in fierce races to win rewards City Racing 3D is a gathering place for the most intense races on the planet. You are part of it, you will have to compete with opponents on the track to win the championship. The tournament is held according to each season. The racers who overcome the challenge of one stage will win tickets to continue racing in the next stage. Of course, the rules and the goals at each stage are different. Sometimes, you have to be one of the first three to finish. Other times, you will have to race alone with limited time (Time Trials). Time Trials challenge is more difficult in my opinion. Because if your driving skills are not good enough, you will lose control in sharp roads. A few moments like that on the track will make you lose the race. For the competition, you will compete with a number of other racers. There is no denying that the tournament has many talented opponents. They maintain a steady performance throughout the track. Therefore, it will be quite hard for you to keep up. But this problem will probably be resolved when you control more fluently, master the drifting technique and own a racing car with a powerful engine. Experience the Multi-player mode with your friends One of the most anticipated features in the racing game is the multiplayer mode. City Racing 3D supports connection via LAN. You and your friends only need to connect to the same wifi network, then you can create rooms and join the race. However, it should also be noted that these races offer no rewards. But after all, having someone competing with you will make you feel not alone, right? Another thing I like about this game, City Racing 3D is optimized quite well. The delay when people connect and play in Multiplayer mode is very low, almost no. That is how this game wins the hearts of the players. Unique racing cars collection If you are a racing car enthusiast, City Racing 3D's car collection will make you feel overwhelmed. This garage contains most of the popular sports racing cars on the market today. From the Ford GT series, Ford Mustang, Ferrari F series to extremely powerful Lamborghini. Now, owning a supercar is at your fingertips. Moreover, City Racing 3D also integrates custom functions. You can change the appearance, paint color as desired. You can even upgrade car parts, to enhance performance and speed. Graphics City Racing 3D graphic is designed on a 3D platform. Although the design is quite sharp, it is still not realistic. The game also includes a variety of racetracks, stretching across the world including Chicago, Tokyo, Paris, London and Hawaii. Enjoy those stunning views with vibrant background music, engine sounds and crashes captured from the real environment. Unlimited Money: You have a lot of money and diamonds in the game. Thanks to that, you can comfortably shop and upgrade expensive supercars without worrying about money. Download City Racing 3D MOD APK for Android City Racing 3D - a realistic racing game with the multiplayer feature already available on Android. Now you can download the racing game you've been waiting for. The championship races are still there, waiting for the worthy man to receive the golden trophy. Is your talent bright enough to win the championship?
